

48-core optical fiber cable for smart buildings

Article Overview

Several companies provide 48-core optical fiber cables for smart building infrastructure, including OWIRE, ScaleFibre, Prysmian, and Zion Communication.

Key Suppliers and Products

1. OWIRE Solutions OWIRE offers 48-strand multimode fiber optic cables designed for high-bandwidth, short- to medium-range applications such as intra-building networks, server farms, and LANs. These cables support multiple fiber grades (OM3, OM4, OM5) for 10 Gigabit Ethernet up to 550 meters and are flexible for easy routing through conduits and trays. OWIRE provides custom lengths, termination options, and lifecycle support, making them suitable for scalable smart building deployments . 2. ScaleFibre Europe – SlimCORE™ 48F The SlimCORE™ 48F is a CPR-rated indoor fiber cable optimized for European enterprise environments. It features a four 12-fiber subunit design for rapid splicing and direct routing through ducts or trays without fanout kits. Available in single-mode (G.657.A1) and multimode (OM3, OM4, OM5), it is ideal for vertical risers, floor-to-floor distribution, and communications cabinet aggregation in commercial buildings and data centers . 3. Prysmian – Indoor Building Riser Cables Prysmian provides indoor riser cables with 12, 24, 36, or 48 Neon™ single-mode fibers. These cables have tight buffer protection and easy-stripping compounds, making them suitable for structured cabling in smart buildings, including risers and shared tray installations . 4. Zion Communication – OPGW 48-Core Cables For projects requiring overhead or long-distance connectivity, Zion Communication offers 48-core OPGW (Optical Ground Wire) cables. These combine lightning protect...
