

6-core optical fiber cable for sale at a low price

Article Overview

6-core fiber optic cables are available at low prices starting around \$0.01 per meter, with options for singlemode and multimode, indoor/outdoor, and armored configurations.

Pricing and Options

- Singlemode 6-core cables are ideal for long-distance transmission, such as telecom backbones and ISP networks, with a narrow 9μm core that minimizes signal loss over tens of kilometers. Prices can start as low as \$0.01 per meter for bulk purchases, especially for armored GYTS cables suitable for outdoor FTTH applications (Alibaba) .
- Multimode 6-core cables (OM3 or OM4) are cost-effective for shorter runs, such as data centers under 550 meters, supporting high-speed 10G Ethernet. These cables often come with plenum-rated jackets for indoor/outdoor use and fire-retardant properties (Amazon) .

Key Considerations

When selecting a low-cost 6-core fiber optic cable, consider:

- Fiber type: Singlemode for long-distance, multimode for short-range high-speed networks.
- Cable structure: Armored cables provide extra protection outdoors but increase cost by 20-50%
