

8-core single-mode fiber optic price inquiry

Article Overview

The cost of 8-core single-mode fiber optic cable typically ranges from \$0.10 to \$7.00 per foot, depending on construction, features, and purchase volume.

Pricing Overview

- Standard bulk cable: Single-mode fiber cables generally cost \$0.10 to \$0.50 per foot for basic outdoor or indoor cables, with higher strand counts slightly increasing the price .
- Bulk wholesale orders: Some suppliers offer around \$0.01 per unit for 8-core single-mode fiber when purchased in large volumes, suitable for patch cord manufacturing or network installations .
- Premium or specialized cables: Armored, pre-terminated, or plenum-rated cables can cost \$2.00 to \$7.00 per foot, reflecting added protection, durability, and installation convenience .

Factors Affecting Price

- Cable Construction: Loose-tube outdoor cables (OS2) are designed for long-distance transmission and harsh environments, which increases cost compared to indoor riser-rated cables .
- Armoring and Protection: Steel-armored or rodent-protected cables provide durability for direct burial or industrial settings, adding to the price .
- Length and Bulk Orders: Buying longer lengths or ordering in bulk can reduce the per-foot cost by 20-40% compared to retail quantities
