

Anti-fall-off cable tray cable release device

Article Overview

Anti-fall-off cable tray devices, such as cable exit clips and dropout waterfalls, secure cables while maintaining proper bend radius and reducing stress during routing.

Cable Exit Clips and Dropout Waterfalls

Cable exit clips and dropout waterfalls are designed to prevent cables from falling off wire mesh or ladder-type cable trays while allowing controlled routing. These devices:

- Maintain proper bend radius to reduce stress, pinching, and fatigue on copper or fiber optic cables .
- Snap onto the tray cross members without additional hardware, allowing flexible installation and expansion for wider cable bundles .
- Guide cables down or between trays at different elevations, easing transitions and minimizing strain .
- Are typically made of rugged metal or powder-coated steel for durability in data centers or industrial environments . For example, Tripp Lite's SRWBWTRFL and SRWBDROP models are 90 mm and 45 mm wide, respectively, and provide a toolless, secure method to route cables through wire mesh trays .

Fall Arrest and Cable Lifeline Systems

For applications where personnel safety is a concern, anti-fall devices for cable lifelines are used:...
