

Are high-strength network cabinets fireproof

Overview

Networking cabinets are not automatically fire proof. A standard network cabinet is mainly designed for equipment installation, cable organization, ventilation, and routine physical protection, while a fire-resistant solution is built and tested for defined fire performance. Real fire protection. We have developed TITANUS RACK•SENS ® to quickly localize a potential start of the fire in a closed server or control cabinet and thus detect it as early as possible. As a complete, compact data center with all infrastructures such as air conditioning, UPS, monitoring, etc. Can a fireproof network cabinet. Consumers often ask themselves how the entire IT can be placed in a compact server cabinet without sacrificing classic data center components such as UPS, fire protection and air conditioning?

The IT-Safe offers the optimal solution here - so that your IT as well as servers and networks remain. Fireproof server cabinets and other technologies like them are the new standard, and businesses are retrofitting existing configurations with newer server room fire suppression systems to minimize risk. For server rack protection against.
