

Are mesh cable trays widely used and what is their price

Article Overview

Wire mesh cable trays typically range from \$10 to \$50 per meter depending on material, size, and finish, with stainless steel and electro-galvanized options being the most common.

Pricing Overview

Wire mesh cable trays, also known as basket trays, are among the most affordable cable management solutions due to their lightweight construction and ease of installation . Prices vary based on material, dimensions, and coating:

- Electro-galvanized steel trays: Generally cost less than stainless steel, offering good corrosion resistance and durability .
- Stainless steel trays (SS304 / SS316): Higher-priced due to superior corrosion resistance and long-term durability, suitable for industrial or outdoor environments .
- Aluminum trays: Lightweight and easier to handle, sometimes slightly more expensive than steel per unit length but cheaper in shipping and installation . On platforms like Alibaba, custom-sized 304 stainless steel wire mesh trays are available with prices starting around \$10-\$20 per meter for standard sizes, with larger or heavy-duty trays costing up to \$50 per meter . Bulk orders and CE-certified trays may include additional benefits such as free samples and extended warranties.

Factors Affecting Cost

- Material and Finish: Stainless steel is more expensive than electro-galvanized ste...
