

Are outdoor cable trays inexpensive

Article Overview

Outdoor cable trays typically range from \$6 to \$50 per meter, depending on material, type, and protective coatings.

Price by Material

- Steel (Hot-Dip Galvanized, HDG): \$5–\$25 per meter. HDG steel is ideal for outdoor use due to its corrosion resistance, making it suitable for parking lots, factories, and exposed installations .
- Aluminum: \$6–\$30 per meter. Lightweight and rust-proof, aluminum is excellent for outdoor environments, especially in coastal or industrial areas where corrosion is a concern .
- Fiberglass Reinforced Plastic (FRP): \$10–\$50 per meter. FRP trays are highly resistant to harsh weather and chemicals, making them suitable for aggressive outdoor conditions .
- Stainless Steel: \$20–\$100 per meter. The most durable and corrosion-resistant option, ideal for extreme environments such as offshore or chemical plants, though it comes at a premium .

Price by Tray Type

- Ladder Trays: Typically more expensive but support heavier cables and allow better ventilation. Recommended for large outdoor installations .
- Perforated or Solid Bottom Trays: Slightly cheaper, suitable for lighter loads or where full cable protection is needed. Outdoor installations often require covers, which can nearly double the cost
