

Barbados Technical Support for Standalone Switch QSFP28

Article Overview

For QSFP28 standalone switches in Barbados, technical support and documentation are available from HPE, Dell, Huawei, and QNAP, covering installation, compatibility, and configuration.

HPE / Aruba QSFP28 Support

HPE provides extensive support for QSFP28 modules, including 100GbE optical transceivers and DAC cables. Their manuals detail MPO and LC connector requirements, module specifications, and compatibility with switches like the Aruba 8400X series. Minimum software versions are specified for proper module operation, ensuring support for both 40G and 100G products (e.g., JL366A module requires software 10.00.0005 or higher) . HPE's support portal allows access to drivers, manuals, and instructional videos for QSFP28 modules .

Dell PowerSwitch QSFP28 Support

Dell's PowerSwitch S4348F-ON is a standalone 1U switch supporting 48x 10G SFP+ and 6x 100G QSFP28 ports. Technical resources, including configuration guides and firmware updates, are available through Dell Barbados support. Some resources require a corporate account for access, but general documentation provides guidance for port configuration, cabling, and network setup .
