

Cable tray bend construction price

Article Overview

Cable tray bends typically cost between \$0.80 and \$2.90 per meter, depending on material, thickness, and supplier options.

Price Range and Material Considerations

The cost of cable tray bends varies significantly based on the material and finish:

- **Galvanized Steel:** Common for indoor and general industrial use; prices generally start around \$0.80 per meter for standard bends .
- **Stainless Steel:** Used in corrosive or high-hygiene environments; prices can reach up to \$2.90 per meter .
- **Aluminum:** Lightweight and corrosion-resistant, often slightly higher than galvanized steel due to material cost and reduced support requirements . Additional factors affecting price include tray thickness, side-height specifications, and compliance with standards such as NEMA or IEC .

Supplier and Procurement Options

- **OEM or Factory-Direct:** Purchasing directly from manufacturers can reduce costs and allow customization for specific project needs .
- **Volume Discounts:** High-volume orders often receive lower per-unit pricing, which is important for large-scale projects .
- **B2B Platforms:** Suppliers on platforms like Alibaba offer competitive pricing, especially for standard 90-degree horizontal bends and risers .
