

Cable tray bend merging techniques

Overview

This guide explains how to make 90° bends, vertical bends, tees, and offsets in wire mesh cable trays safely and professionally. Vertical Bend (Up / Down Bend) □□ Use case: Going. Watch how a professional fabricator bends a ladder cable tray with precision using the right tools and expert techniques. You can buy a manufactured 90 degree bend or make one on a cable tray bending machine but in this video I show you how to make one completely installed, without damage either to conductors or structural system use maintain spacing or to keep cables in place when the tray is bent the minimum bend radius for cables as they exit the bottom of the cable tray. Unlike perforated trays, bends can be created directly at site without expensive fittings. headquartered manufacturer with over 130 years of supplying solutions for the electrical and data markets.
