

Commonly Used Distribution Box Models for Factory Lighting

Article Overview

Lighting distribution boxes for factories typically include wall-mounted, surface-mounted, pole-mounted, single-phase, three-phase, and smart DB boxes designed for safe and efficient power distribution to lighting circuits.

Key Types of Lighting Distribution Boxes

1. Wall-Mounted Distribution Boxes These are installed directly on walls and are ideal for industrial environments where space is limited. They provide easy access for maintenance and are commonly used for factory lighting circuits . 2. Surface-Mounted and Flush-Mounted Boxes

- Surface-mounted boxes are attached to the wall surface, suitable for retrofits or industrial setups.
- Flush-mounted boxes are embedded into walls for a cleaner appearance, often used in commercial or mixed-use factory areas . 3. Pole-Mounted Distribution Boxes Designed for outdoor lighting or factory yards, these boxes are mounted on poles and feature weather-resistant enclosures to withstand harsh environmental conditions . 4. Single-Phase and Three-Phase Boxes

- Single-phase DB boxes are used for smaller lighting loads or localized factory areas.
- Three-phase DB boxes are essential for large industrial facilities requiring higher power capacity and multiple lighting circuits . 5. Lighting-Specific Distribution Boxes These boxes are dedicated to managing lighting circuits with integrated protection devices such as Miniature Circuit Breakers (MCBs) and residual current devices (RC...
