

Complete List of Cuban Electrical Distribution Box Models

Article Overview

Cuban electrical distribution boxes include main distribution boards, sub-distribution boards, consumer units, meter panels, and specialized control or smart DB boxes for residential, commercial, and industrial use.

Overview

Electrical distribution boxes, or DB boxes, are enclosures that safely distribute incoming electrical power to multiple circuits while providing overcurrent protection and isolation for maintenance. In Cuba, as in other countries, these boxes are essential for residential, commercial, and industrial electrical systems, ensuring safety, reliability, and organized power management .

Common Types

- **Main Distribution Board (MDB)** The MDB serves as the central hub for distributing electricity to various sections of a building or facility. It typically includes bus bars, main circuit breakers, and protective devices to manage load distribution and prevent overloading .
- **Sub-Distribution Board (SDB)** SDBs are secondary panels that receive power from the MDB and distribute it to specific areas, such as apartments, offices, or industrial zones. They often include miniature circuit breakers (MCBs) and residual current devices (RCCBs) for localized protection .
- **Consumer Unit** Common in residential settings, consumer units house fuses or circuit breakers and RCDs to protect individual circuits. They are designed for easy...
