

Complete List of Large-Span Cable Tray Models

Article Overview

Large span cable trays are designed for heavy-duty, long-distance cable support, available in ladder, channel, and perforated styles with various materials and finishes for industrial and outdoor applications.

Types and Designs

Large span cable trays come in several structural types to accommodate different cable management needs:

- Ladder type: Features rungs for supporting heavy cables and allows easy cable tying and ventilation.
- Channel type: Solid or perforated channels suitable for medium loads and controlled cable routing.
- Perforated type: Offers ventilation and heat dissipation, ideal for sensitive or heat-generating cables . These trays can be configured with straight runs, horizontal bends, tees, crosses, reducers, and vertical bends to create complete cable routing systems .

Materials and Finishes

Large span cable trays are manufactured from durable materials to withstand harsh industrial environments:...
