

Connect the fiber optic cable to the router s network port

Article Overview

You cannot plug a fiber optic cable directly into a standard router; it must first connect to an Optical Network Terminal (ONT), which converts the fiber signal to Ethernet for the router.

Required Equipment

- Optical Network Terminal (ONT): Provided by your ISP, this device converts the incoming fiber optic signal into an electrical signal compatible with your router .
- Fiber optic cable: Typically single-mode with SC/APC or SC/UPC connectors .
- Router: Ensure it has a WAN or Ethernet port to receive the signal from the ONT .
- Ethernet cable: Cat6a or higher is recommended to maintain high-speed performance .

Step-by-Step Connection Process

- Install the ONT
- Locate the fiber wall outlet where your ISP's fiber line enters your home.
- Connect the fiber optic cable from the wall outlet to the ONT's optical input port, handling the connector carefully to avoid dirt or damage .
- Power on the ONT and wait for the status lights to stabilize, indicating a successful connection to the ISP network .
- Connect the ONT to the Router
- Use an Ethernet cable to link the ONT's LAN or Ethernet output port to the router'...
