

Connect the router s 10 Gigabit port to the fiber optic cable

Overview

Connect the fiber optic cable from your ISP to the ONT (Optical Network Terminal) provided. Power on all devices and configure your router for the internet connection. Compatible router: Verify that your router supports fiber optic input (look for an SFP or WAN port labeled). The fiber optic cable does not plug directly into a standard home router because the signal type must be translated. When it comes to high-speed internet, fiber optics is the gold. As 10GbE technology becomes integral to modern digital lifestyles—powered by 8K streaming, VR ecosystems, and smart home innovations—upgrading to a 10G fiber home network is no longer a niche project but a future-proof investment.
