

Connect the wiring according to the electrical box assembly

Article Overview

Connect wires in a junction box by following the sequence: ground wires first, neutral wires second, and hot wires last, using pigtails and wire nuts or lever-nut connectors for secure, code-compliant connections.

Safety First

Before starting, turn off power at the circuit breaker and verify with a voltage tester that no electricity is present. Always wear insulated gloves and ensure the box is properly sized for the number of wires to prevent overcrowding, which can be a fire hazard .

Step-by-Step Wire Connection

- Prepare the Wires
 - Strip about $\frac{3}{4}$ inch of insulation from each wire end.
 - Inspect wires for damage and ensure they are clean and straight.
- Connect Ground Wires
 - Bundle all bare or green ground wires together, including a pigtail if connecting to a metal box.
 - Twist the wires together using lineman's pliers, then secure with a wire nut or lever-nut connector .
 - This ensures the safety ground is connected first, protecting against accidental energization....
