

# Cost-based 1G optical switch

## Article Overview

Affordable 1G optical switches can be built using generic 1G SFP modules, offering reliable Gigabit Ethernet connectivity while reducing costs by up to 80% compared to OEM solutions.

### Overview of 1G Optical Switches

1G optical switches rely on SFP (Small Form-factor Pluggable) modules to connect network devices over fiber or copper. These modules convert electrical signals into optical signals for transmission over fiber, or vice versa for copper links, supporting 1 Gbps data rates commonly used in enterprise, campus, and data center networks .

### Types of 1G SFP Modules

- 1000BASE-SX (Short Wavelength): Multimode fiber, up to 550 meters, ideal for short-range connections within buildings or campuses .
- 1000BASE-LX/LH (Long Wavelength): Single-mode or multimode fiber, up to 10-20 km, suitable for inter-building or campus-wide links .
- 1000BASE-TX (Copper RJ45): Cat5/6 copper cables, up to 100 meters, cost-effective for short-range deployments . These modules are hot-swappable, allowing installation or replacement without network downtime, and are compatible with a wide range of switches from vendors like Cisco, Huawei, Juniper, Arista, and generic brands .

### Cost Considerations

- Third-party SFP modules: Generic or third-party 1G SFPs, such as those from OPTC...
