

Costa Rica switch distribution box dimensions

Article Overview

Switch distribution boxes in Costa Rica typically follow standard electrical box dimensions, with single-gang boxes around 2" x 3" x 3.5" and multi-gang or junction boxes ranging from 4" x 4" with variable depths, adapted for local code compliance and environmental conditions.

Standard Dimensions

- Single-gang boxes: Approximately 2 inches wide x 3 inches high x 3.5 inches deep, suitable for one switch or outlet. Depth may vary from 1.5" to 3.5" depending on wire count and internal volume requirements .
- Multi-gang boxes: Designed to accommodate multiple switches or outlets in one location, widths increase proportionally (e.g., 4" x 4" or larger), with depth options to ensure sufficient space for wiring and splicing .
- Junction boxes: Often square or rectangular, typically 4" x 4" or larger, with multiple depth options to allow for safe conductor connections and future access .

Local Considerations in Costa Rica

- Regulatory compliance: Boxes must meet the Código Eléctrico Nacional (CNE), which aligns with NFPA 70 / NEC standards, ensuring safety and proper installation for residential, commercial, and industrial applications .
- Material selection: Coastal and high-humidity areas like Limón and Puntarenas require corrosion-resistant materials such as 304 or 316 stainless steel or IP65-rate...
