

# Data Center Cable Tray IP65 Warranty

## Article Overview

IP65-rated cable trays provide dust-tight and water-resistant protection, ideal for data centers, and most reputable manufacturers offer warranties covering defects and performance.

### IP65 Cable Tray Overview

IP65-rated cable trays are designed to protect cables from dust ingress and low-pressure water jets, making them suitable for data centers with strict environmental control requirements. These trays are typically made from welded steel, aluminum, or halogen-free PC-ABS materials, offering high strength, durability, and compliance with fire safety standards (UL 94 V-0) for sensitive optical and power cables. Wire mesh trays, such as Cablofil® by Legrand, provide open designs for airflow while maintaining structural integrity, and can be combined with bend and drop systems for flexible routing.

### Key Features

- **Material and Construction:** Steel mesh or ladder trays with corrosion-resistant coatings or halogen-free plastics for safety and longevity.
- **Load Capacity:** Designed to support heavy bundles of fiber optic or copper cables without compromising bend radius or cable integrity.
- **Installation Efficiency:** Systems like Cablobend™ allow fast, tool-free bends and drops, reducing installation time by up to 50% compared to traditional bolted connections.
- **Environmental Protection:** IP65-rated trays prevent dust and water ingress, ensuri...
