

Dedicated USB socket for distribution box

Article Overview

Dedicated USB sockets for distribution boxes are available in panel-mount and DIN rail designs, offering USB-A and USB-C ports with industrial-grade protection and easy integration.

Types of USB Sockets

Panel-Mount USB Sockets: These are designed to be installed directly on the front of a distribution box or cabinet. They often feature rugged housings with IP65 protection, protective caps, and corrosion-resistant contacts, making them suitable for industrial and outdoor environments. They are available in USB 3.0 for high-speed data transfer and can be combined with RJ45 ports for network connectivity .

DIN Rail or Service Interface USB Sockets: These sockets are mounted inside control cabinets or distribution boxes, either on a DIN rail or via direct mounting. They can include USB-A and USB-C ports, support USB 3.0 speeds, and are designed for harsh industrial environments. Some models also feature LED indicators, fuses, or switches for enhanced safety and operational monitoring .

Integration with Distribution Systems

Modern distribution boxes, such as the Bals VARIABOX, allow integration of USB sockets alongside other interfaces like RJ45 and HDMI. These systems are modular, enabling flexible configuration depending on the number of devices and types of connections required . ABB and Phoenix Contact also provide solutions that integrate USB outlets into low-voltage distribution systems, ensuring safe and efficient power...
