

Dimensions of Integrated Communication Outdoor Cabinets

Article Overview

Outdoor integrated communication cabinets typically range from 12U to 47U in height, with widths around 600-800mm and depths from 600-800mm, often customizable to meet specific deployment needs.

Standard Dimensions

Outdoor communication cabinets are designed to house telecom and network equipment securely while withstanding harsh environmental conditions. Common rack unit (U) heights include 12U, 18U, 19U, 20U, 22U, 27U, 32U, and 47U, allowing flexibility for different equipment loads . Standard widths are typically 600-800mm, and depths range from 600-800mm, though many manufacturers offer custom dimensions to fit site-specific requirements .

Material and Environmental Considerations

Cabinets are constructed from galvanized steel, stainless steel, aluminum, or composite materials to resist corrosion, UV exposure, and salt in coastal areas . IP ratings such as IP55 to IP68 and NEMA standards 3R to 6 ensure protection against dust, rain, snow, and extreme temperatures . Some cabinets include thermal regulation systems like fans, air conditioners, or heat exchangers to maintain optimal internal temperatures .
