

Dimensions of Somali Aluminum Alloy Distribution Boxes

Article Overview

Somali aluminum alloy distribution boxes typically feature customizable dimensions, with width, height, depth, and wall thickness tailored to application needs, often ranging from small terminal enclosures to larger distribution panels.

General Dimensions and Structure

Aluminum alloy distribution boxes are usually rectangular or square in cross-section, with dimensions expressed as width (horizontal side), height (vertical side), and wall thickness. Standard wall thicknesses for diecast or extruded aluminum boxes range from 2 mm to 4 mm, providing sufficient strength and corrosion resistance for outdoor or industrial use. The overall size depends on the number of poles or internal components, with smaller terminal boxes accommodating 6-12 poles and larger distribution boxes supporting 30 poles or more.

Typical Size Ranges

- Small terminal boxes: approximately 100-200 mm width, 100-150 mm height, 50-100 mm depth.
- Medium distribution boxes: approximately 250-400 mm width, 300-500 mm height, 150-250 mm depth.
- Large distribution panels: can exceed 600 mm width, 800 mm height, 300 mm depth, depending on the number of bus bars and MCCB arrangements. Boxes often include rounded corners (corner radii r_1 , r_2) for safety and structural integrity, and...
