

Dimensions of electrical distribution boxes for self-built houses in Qatar

Article Overview

For modern residential homes in Qatar, standard electrical distribution boxes typically range from 200A main breaker panels with dimensions around 600–800 mm height, 400–600 mm width, and 150–200 mm depth, with variations for multi-gang or outdoor enclosures.

Standard Residential Distribution Box Sizes

For self-built houses, the most common residential distribution boxes include main breaker panels, sub-panels, and junction boxes:

- **Main Breaker Panels (200A):** Considered the standard for modern homes, especially to support electric vehicles and smart home systems. Typical dimensions are 600–800 mm height × 400–600 mm width × 150–200 mm depth .
- **100A Panels:** Smaller homes or older designs may use 100A panels, which are slightly smaller, around 500–600 mm height × 300–400 mm width × 120–150 mm depth .
- **Wall-Mounted Distribution Boxes:** These are available in modular sizes and can be arranged horizontally or vertically. They are made from PC/ABS or steel, with IP44–IP66 ratings for indoor or outdoor use . Dimensions vary widely depending on the number of circuits, but single-unit boxes often start at 300–400 mm height × 250–350 mm width × 120–150 mm depth .
- **Junction Boxes:** Used for splicing and branch connections, typically 100–200 mm per side for small residential applications, with deeper boxes preferred when multip...
