

Distribution Box XM Model Description

Overview

XM series integrated distribution box/cabinet is suitable for AC frequency 50Hz, rated voltage 220V or 400V single-phase or three-phase five-wire lighting and small power lines, it is used to control, distribute, and meter electrical equipment, and to protect against. XM series integrated distribution box/cabinet is suitable for AC frequency 50Hz, rated voltage 220V or 400V single-phase or three-phase five-wire lighting and small power lines, it is used to control, distribute, and meter electrical equipment, and to protect against. XM Low voltage distribution box is sorted into lighting and motor control box, including common type, outdoor type, with observation window. Both recess mounting and indoor wall mounting can be supplied according to customer requirement. Meanwhile, a series of structural dimensions are designed to. Detailed description: The switchboard is designed for use in office and administrative buildings, commercial facilities, and residential premises in general AC 50 Hz distribution networks with a rated voltage of 220/380 V. Designed with a robust steel enclosure, it safely houses circuit breakers, fuses, and control devices to manage lighting, motor loads, and. XM series integrated distribution box/cabinet is a series of products developed by our company on the basis of absorbing the advantages of the current domestic popular distribution box/cabinet, the box/cabinet body is made of high-quality cold-rolled steel plate, processed by CNC machine tools. XM. XM distribution box has many characteristics, including flexible and diverse structural design, excellent protection performance and rich and practical functional configuration.
