

Distribution box set with 30 circuits

Article Overview

A 30-circuit distribution box provides safe, organized power distribution for industrial, commercial, or large-scale residential applications, with options for indoor use, three-phase power, and UL-certified enclosures.

Overview

A 30-circuit distribution box is designed to manage multiple electrical circuits from a single power source, ensuring safe and efficient distribution of electricity. These units are commonly used in industrial work sites, construction projects, high-rise buildings, and large residential complexes . They allow operators to tap into a main power supply and distribute it across multiple circuits, protecting equipment and personnel.

Key Features

- **Circuit Capacity:** 30 individual circuits, often with a main circuit breaker for overall protection .
- **Voltage and Phase:** Options include three-phase 480Y/277V AC for industrial applications .
- **Amperage:** Panels can handle high current loads, such as 1200A, suitable for heavy-duty equipment .
- **Enclosure Type:** NEMA 1 enclosures are common for indoor use, providing protection against dust and dirt. NEMA 4 or 4X options are available for moisture and outdoor protection .
- **Construction:** Typically made of steel or durable materials to withstand demanding environments
