

Distribution box with 8 to 10 circuits

Article Overview

Distribution boxes with 8 to 10 circuits are widely available in modular consumer units and passive industrial enclosures, offering flexible mounting, safety features, and reliable electrical distribution.

Overview

Distribution boxes, also known as consumer units or panelboards, are designed to safely distribute electrical power to multiple circuits. For 8 to 10 circuits, these boxes typically support modular circuit breakers (MCBs) and include internal terminal blocks for neutral and protective grounding connections. They are suitable for residential, commercial, and light industrial applications.

Types and Features

1. Modular Consumer Units (e.g., Chint NX Series)

- Available in configurations such as 8, 10, 12, 15, 20, and 24 ways .
- Rated for up to 100A, 230V AC, 50/60Hz .
- Features include neon indicator lights, exposed handles for easy operation, and plastic enclosures with metal reinforcement .
- Internal terminal blocks allow secure connection of neutral and protective grounding wires .
- Modular design allows flexible assembly of circuit combinations and easy replacement of MCBs....
