

Easy installation of Class A multimode fiber optic quick connectors at the end face

Article Overview

Class A multimode fiber optic quick connectors can be installed efficiently using pre-polished or mechanical connectors, requiring minimal tools and providing low-loss terminations.

Connector Types and Selection

For easy field installation, pre-polished mechanical connectors are recommended. These connectors come with a factory-polished fiber stub and index-matching gel, eliminating the need for hand polishing and ensuring precise fiber alignment for multimode fibers (250 μm , 900 μm , 2 mm, or 3 mm) . Common connector types include LC, SC, and ST, all compatible with multimode fibers .

Tools and Materials Needed

- Fiber optic quick connectors (pre-polished or mechanical)
- Fiber cleaver or cutting tool for precise end-face preparation
- Cleaning supplies: isopropyl alcohol, lint-free wipes
- Safety equipment: safety glasses, gloves, and black work mat to catch fiber shards
- Optional: small pliers or connector insertion tool for snap-fit connectors

Step-by-Step Installation...
