

Electric Distribution Box Cover Plate Quota

Article Overview

Electric distribution box cover plates are available in various types and materials, with supply quantities typically determined by manufacturer or distributor stock rather than a fixed quota.

Types of Cover Plates

Electric distribution box cover plates are designed to protect live electrical components and provide a finished appearance. Common types include:

- **Metallic Cover Plates:** Made from steel, aluminum, or stainless steel, these are durable and often used in commercial or industrial settings .
- **Non-Metallic Cover Plates:** Typically plastic or composite materials, suitable for residential or indoor applications .
- **Weatherproof and While-in-Use Covers:** Designed for outdoor or exposed environments, resistant to moisture, dust, and corrosion .
- **Blank or Filler Plates:** Used to close off unused outlets or switches, often with gaskets to prevent dust and moisture ingress .

Standards and Compliance

Cover plates must comply with UL listing and CSA certification to ensure safety and regulatory compliance. They are designed according to NFPA 70 (National Electrical Code) and may follow IEC standards for spacing and protection in distribution board...
