

Electrical distribution box assembly drawing with dimensions

Article Overview

Electrical distribution box dimensions are typically specified in the construction drawings, with illustrative examples showing tolerances of $\pm 10\%$ depending on KVA rating and manufacturer design.

General Construction and Material

Distribution boxes are generally fabricated from 2 mm GI sheet steel or CRCA MS, reinforced with suitable channels for structural stability. The roof is slightly slanted with a 50 mm overhang at the front and back, and doors are equipped with Godrej-type 3-position locking systems for security. Hinges are concealed, and boxes include solid earthing points on either side, conforming to IP-55 protection standards for outdoor use .

Typical Dimensions and Tolerances

- The dimensions of LT distribution boxes are often illustrative in specifications, allowing manufacturers to propose their own sizes within a $\pm 10\%$ tolerance over the specified dimensions .
- For 63/100/160/315 KVA boxes, the internal layout accommodates busbars, isolators, and outgoing feeders, with busbar sizes ranging from 72×50×8 mm for 63/100 KVA to 120×50×15 mm for 160/315 KVA boxes .
- Terminal connector strips on isolators project 80 mm minimum on the cable connection side and 60 mm minimum on the HRC fuse base side, ensuring proper cl...
