

Electrical distribution box cover on the staircase wall

Article Overview

You can safely conceal an electrical distribution box on a staircase wall using removable decorative covers, hinged panels, or custom-built enclosures while maintaining code-required access.

Safety and Accessibility Considerations

Before covering the panel, ensure compliance with the National Electric Code (NEC) and local regulations. The panel must have a minimum working space of 30 inches wide and 36 inches deep, extending vertically from the floor to 6.5 feet, to allow safe access for maintenance or emergencies . Avoid permanent obstructions, flammable materials, or heavy objects that could hinder quick access . Any cover should be easily removable or operable with one hand.

Decorative and Functional Cover Options

- **Hinged Artwork or Picture Frames:** Mount a lightweight framed canvas or picture on hinges so it swings open like a door, providing instant access to the panel .
- **Sliding Panels:** Use thin wooden or metal panels on tracks above and below the panel to slide horizontally, keeping the panel accessible while blending with the wall .
- **Custom Cabinet or Built-In Enclosure:** Build a shallow cabinet or false wall around the panel, ensuring the required clearance is maintained. Use a hinged door or push-latch panel for access .
- **Decorative Wall Hangings or Tapestries:** Lightweight fabric panels or tapestries can be hung in front of the panel, provided they are flame-resistant and do not touch th...
