

Embedded Fiber Optic Cold Joint Cooler Connector sc

Article Overview

Embedded SC cold connectors are field-installable fiber optic connectors that enable quick, reliable, and low-loss terminations without fusion splicing.

Overview

Embedded SC cold connectors, also known as mechanical splice or fast connectors, are designed for field termination of fiber optic cables. They allow installers to connect fibers without using a fusion splicer, relying instead on a pre-embedded fiber stub and index-matching gel or mechanical clamping to align the fibers accurately (). These connectors are widely used in FTTH deployments, patch panels, and distribution boxes, providing fast and convenient installation.

Types and Polishing

- SC/UPC (Ultra Physical Contact): Features a flat endface with return loss $\geq 50\text{dB}$, suitable for general fiber optic networks ().
- SC/APC (Angled Physical Contact): Features an 8-degree angled endface with return loss $\geq 60\text{dB}$, ideal for PON systems, GPON, EPON, and CATV networks where low back reflection is critical ().

Structure and Function

The connector contains a pre-placed bare fiber inside a ceramic ferrule. The field fib...
