

Export Optical Splitter Box

Article Overview

Optical splitter boxes, essential for fiber optic networks, can be exported worldwide with customizable configurations, robust protection, and reliable delivery.

Overview of Optical Splitter Boxes

Optical splitter boxes are used to split and distribute optical signals in fiber optic networks, particularly in FTTH (Fiber to the Home) and FTTX deployments. They come in various formats including ABS boxes, LGX, cassette, rack mount, ribbon fiber, steel tube, fan-out, and tray types, supporting 1xN or 2xN split configurations. These boxes ensure stable optical performance, low insertion loss, and high reliability for network transmission.

Key Features for Export

- Customization: Split ratios, connector types (LC, SC, E2000®, ST), cable lengths, and packaging can be tailored to project requirements.
- Durability: Many boxes are IP65 rated, waterproof, dustproof, and resistant to high temperatures, suitable for indoor and outdoor installations.
- Material Quality: Manufacturers use ABS, plastic, or stainless steel, ensuring corrosion resistance and smooth finishes.
- Capacity: Boxes can accommodate multiple cores (1-24 cores) and include splice cassettes for organized fiber management.
