

Exterior of a Bulgarian electrical distribution box

Article Overview

Bulgarian electrical distribution boxes typically feature durable, weather-resistant exteriors made of metal or reinforced polyester, often with IP65 protection for outdoor use.

Materials and Construction

Bulgarian distribution boxes are commonly made from high-quality metal or flame-retardant, UV-resistant polyester reinforced with fiberglass. Outdoor boxes are designed to withstand harsh weather, chemical exposure, and mechanical impact, making them suitable for residential, commercial, and industrial environments. The base and lid are often reinforced, with options for transparent polycarbonate lids to allow visual inspection of meters without opening the box.

Protective Features

Most outdoor boxes have an IP65 protection rating, ensuring they are dust-tight and protected against water jets. They include high-strength hinges, secure locking mechanisms, and sometimes anti-static coatings. Flame and impact resistance are standard, and the boxes can operate in temperatures ranging from -25°C to +200°C.

Design and Appearance

The exterior is typically rectangular with smooth or slightly textured surfaces, avail...
