

FTTH Fiber Optic Terminal Box 2 Cores

Article Overview

A 2-core FTTH fiber optic terminal box is a compact, durable enclosure designed for splicing, terminating, and managing two optical fibers in residential or business networks.

Overview

A 2-core FTTH fiber optic terminal box serves as the termination point for fiber optic drop cables and pigtails, providing a secure interface for connecting subscriber patch cords to the Optical Network Unit (ONU) in FTTH or FTTB networks . It is typically made from high-quality ABS or flame-retardant PC plastic, offering mechanical protection, impact resistance, and environmental stability . The box is designed for indoor wall-mount, desktop, or concealed panel installations, making it versatile for homes, offices, and villas .

Key Features

- **Capacity and Ports:** Supports 2 fibers with 2 SC ports and is compatible with LC duplex adapters, allowing up to 4-core splicing when using LC configurations .
- **Splicing and Termination:** Accommodates both mechanical and fusion splicing, with internal routing for proper fiber bend radius and slack management .
- **Cable Access:** Multiple inlets from the bottom and sides allow flexible entry for drop cables ranging from 0.9 mm to 3 mm .
- **Protection:** Provides dust and moisture resistance, with some models rated IP55, ensuring durability in various indoor environments .
- **Design:** Features sliding or hinged covers for easy access, reducing the risk of fiber damage .
