

Fiber Optic Cable Hanging Reel

Article Overview

Fiber optic cable reels can be safely hung using modular, tactical, or ruggedized reel systems designed for controlled deployment and environmental protection.

Types of Reels Suitable for Hanging

Modular Advanced Reel Systems (MARS) are lightweight, polymer-based reels that can be mounted on A-frames, tripods, or bumper mounts, making them ideal for hanging in temporary or harsh environments. They include features like flip-out handles, connector cradles, and stackable designs for efficient storage and deployment (OCC) . Tactical aluminum reels are designed for mobile and temporary installations, with fold-in swivel handles, brakes, and stacking capability. These reels can be hung or mounted on frames for field deployment, supporting fiber lengths from 100 m to 500 m (Foss) . Ruggedized reels from manufacturers like Micropol and Belden are engineered for harsh conditions, including outdoor events, military operations, and industrial sites. They feature secure locking mechanisms, rotation brakes, and auxiliary spools, allowing safe hanging and controlled unwinding of fiber optic cables .

Hanging and Mounting Considerations

- **Support Structure:** Use A-frames, tripods, or wall/ceiling mounts rated for the reel's weight. Ensure the structure is stable and can handle dynamic forces during cable deployment.
- **Tension Control:** Reels should include brakes or drag mechanisms to prevent uncontrolled unwinding, which can damage delicate fiber strands .
- **Orientation:** Hang reels so the cable feeds smoothly from the drum without sharp...
