

# Fiber optic connector wiring and pricing

## Article Overview

Fiber optic connectors require precise alignment and careful termination, with wiring methods including epoxy and polish, mechanical splice, and fusion splice, and prices ranging from a few dollars to over \$50 per connector depending on type and quality.

### Common Connector Types

- LC: Small form factor, widely used in LANs and data centers, space-saving design ( ).
- SC: Push-pull mechanism, common in older and current networks ( ).
- ST: Bayonet-style, often used in multimode fiber systems ( ).
- MPO: High-density parallel connections, typically factory-terminated for data centers ( ).
- FC: Threaded, mainly for single-mode networks ( ).

### Correct Wiring and Termination Methods

- Epoxy and Polish
  - Fiber is inserted into a ferrule with epoxy.
  - Epoxy is cured (UV or thermal), then the fiber end is polished.
  - Provides durable, low-loss connections.
  - Requires tools: epoxy, curing device, fiber stripper, cleaver, polisher, microscope ( ).
- Mechanical Splice
  - Fibers are aligned in a mechanical fixture without adhesive.
  - Quick and suitable for temporary or rapid repairs....
