

Handheld OTDR for Data Centers in South Africa

Article Overview

Several handheld OTDRs are available in South Africa, offering multifunctional fiber testing for data centers, including the FT-M1000, UltraLAN FIB-T-OTDR1315, and ST3200F-A Mini-OTDR.

Recommended Handheld OTDR Options

- 1. FT-M1000 Mini OTDR** The FT-M1000 is a compact, all-in-one OTDR designed for fiber optic installations and maintenance. It integrates OTDR functionality with an Optical Power Meter (OPM), Optical Light Source (OLS), Visual Fault Locator (VFL), and Ethernet testing. Its lightweight design and user-friendly interface make it ideal for fieldwork in data centers, enterprise networks, and FTTH installations, providing accurate fault detection, loss testing, and network verification.
- 2. UltraLAN FIB-T-OTDR1315** This professional-grade OTDR features a 5.5-inch touchscreen and supports wavelengths of 1310/1550nm with dynamic ranges of 26/24dB. It combines OTDR testing, VFL, OPM, loss testing, stable laser source output, RJ45 TDR testing, UTP cable diagnostics, and fiber end inspection. The device can test fiber links up to 100 km, making it suitable for both short and long-range data center fiber networks.
- 3. ST3200F-A Mini-OTDR** The ST3200F-A offers a 4.3-inch capacitive touchscreen and integrates 12 functions, including auto and expert OTDR modes, event mapping, OPM, RJ45 cable tracking, and reporting. It supports CW/270/330/1k/2kHz frequency identification, VFL, and laser source operation simultaneously. Its rugged handheld design is suitable for FTTH, backbone networks, maintenance, and emergency repair, providing high-resolution measurements for fiber length, loss, and connection quality.
