

High-precision optical transmitters in Singapore

Article Overview

Singapore hosts several leading providers of high-precision optical transmitters and components, including Bote Optics, FS.com Singapore, WEO Corporation, and Singapore Dynamic Optronics.

Key Providers

Bote Optics (S) Pte Ltd specializes in custom optical components, precision lenses, and complete optical system design. They offer precision spherical and aspherical lenses, optical coatings, and custom lens assemblies for applications in imaging, sensing, and laser systems. Their Singapore facility provides end-to-end services from prototype to volume production, including diamond-turning, CNC grinding, polishing, thin-film coating, and clean-room assembly under ISO 9001:2015 standards. Bote also performs in-house metrology, interferometry, and environmental testing to ensure high accuracy and reliability in optical systems . FS.com Singapore provides a wide range of fiber optic transceivers suitable for high-speed networks, supporting speeds from 100M to 800G. Their modules are tested in-house and compatible with various network architectures, making them suitable for high-precision optical transmission in telecommunications and data centers . WEO Corporation is another Singapore-based manufacturer focusing on high-precision optical components and opto-mechanical assemblies. They cater to industries requiring exacting optical performance, including scientific research and industrial laser systems . Singapore Dynamic Optronics (SDO) delivers optical components, modules, and sub-assemblies for precision optics applications. They emphasize loca...
