

How do I install a fiber optic router

Article Overview

Installing a fiber optic router involves connecting the Optical Network Terminal (ONT) to your router using an Ethernet cable and configuring your network for optimal performance.

Step 1: Prepare the Equipment

Before starting, ensure you have the following:

- Optical Network Terminal (ONT) provided by your ISP, which converts the fiber signal into data your router can use.
- Compatible router with a WAN or SFP port labeled for fiber or ONT connection.
- Fiber optic cable (usually thin, yellow, with SC/APC or SC/UPC connectors).
- Ethernet cable (CAT6 or higher recommended) to link the ONT to your router ().

Step 2: Install the ONT

- Locate the fiber optic wall outlet where the ISP's fiber line enters your home.
- Connect the fiber optic cable from the wall outlet to the ONT's designated port.
- Power on the ONT and wait for the status lights to stabilize (typically 2-5 minutes) ().

Step 3: Connect the Router

- Use an Ethernet cable to connect the ONT's Ethernet/LAN port to your router's WAN port.
- Power on the router and wait for the indicator lights to confirm a successful connection....
