

How much does a commercial electrical distribution box cost in Algeria

Article Overview

Commercial electrical distribution boxes in Algeria typically range from approximately 50,000 DZD to over 500,000 DZD depending on specifications, voltage, and whether the unit is imported or locally manufactured.

Price Range and Factors

The cost of a commercial distribution box in Algeria depends on several factors:

- **Voltage and Capacity:** Standard low-voltage panels for commercial use are generally less expensive, while medium-voltage or high-capacity units for industrial applications cost significantly more .
- **Local vs Imported:** Locally manufactured boxes are usually more affordable, but high-specification or smart distribution boxes often need to be imported, increasing the price due to shipping, customs, and compliance with international standards like CE, RoHS, and IEC 61439 .
- **Material and Durability:** Outdoor or industrial-grade boxes with stainless steel, UV-resistant coatings, and thermal management features are priced higher to withstand harsh Algerian climates, including high temperatures, sandstorms, and coastal salinity .
- **Brand and Certification:** Reputable brands such as ABB, represented by distributors like Electrissima, may command higher prices due to quality assurance, warranty, and compliance with Algerian standards (IANOR) and international certifications
