

How much does a two-box electrical distribution box cost on a construction site

Article Overview

A two-box electrical distribution setup for a construction site typically costs between \$400 and \$1,500 per unit, depending on specifications, materials, and installation requirements.

Price Range and Factors

The cost of a distribution box depends on several factors:

- **Material and Build:** Construction-site boards like ENERGYBOX use durable technopolymer cabinets with fire-resistant backrests, designed for repeated use on multiple sites, which increases the upfront cost compared to basic plastic or metal boxes .
- **Pre-Wired vs Empty:** Pre-wired boards are more expensive but save labor time and reduce installation errors. Empty enclosures are cheaper but require additional components like breakers, busbars, and wiring .
- **Amperage and Circuit Capacity:** Higher amperage ratings and more circuit spaces increase the price. Standard residential panels range from \$150 to \$1,500 including labor, while industrial or construction-grade units can exceed this range .
- **Weatherproofing and IP Rating:** Outdoor or temporary site boxes often have IP65 ratings for dust and water protection, which adds to the cost .
- **Labor and Installation:** Professional installation on a construction site can add \$10...
