

How much does fiber optic cable threading typically cost

Article Overview

Fiber optic cable threading typically costs between \$10 and \$50 per foot, depending on installation method, cable type, and labor complexity.

Cost Breakdown

Materials: Fiber optic cable itself ranges from \$1 to \$6 per linear foot for retail purchases, with single-mode fiber generally cheaper than multimode fiber, and bulk wholesale prices as low as \$0.09 per foot for simple drop cables . Pre-terminated cables and patch assemblies cost more due to factory terminations.

Labor and Installation: Threading fiber through conduits or underground paths involves labor-intensive work. Typical labor rates for skilled technicians range from \$60 to \$180 per hour, with fusion splicing adding additional time and cost . Fusion splicing itself costs \$50-\$150 per splice point, depending on fiber count, site conditions, and access .

Trenching and Directional Drilling: Underground installation is more expensive than aerial or indoor runs. Directional drilling (trenchless installation) can cost \$15-\$50 per foot, with median deployment costs around \$18.25 per foot including labor and materials. Aerial installations are cheaper, averaging \$6.55 per foot . Trenching costs for urban street crossings or complex paths can range from \$8-\$40 per foot .

Project Size and Complexity: Longer runs, higher fiber counts, and urban environments with traffic control or confined spaces increase costs. Multi-fiber cables reduce per-splice costs through volume pricing, but total project costs rise with distance and complexity
