

How much does it cost to lay fiber optic cable per kilometer

Overview

Typical cost range for laying fibre optic cable per kilometer in the U. generally spans roughly \$12,000 to \$90,000, depending on terrain, urban density, and regulatory requirements. The price often reflects project scope, geography, and local regulations, making. These networks are constructed both underground and through aerial fiber, at an average cost of \$1,000 to \$1,250 per residential household passed or \$60,000 to \$80,000 per mile. Dgtl Infra provides an in-depth overview of fiber optic network construction, including its density, as measured by. This guide presents practical price ranges in USD to help buyers estimate a full-mile fiber project and compare alternatives. Urban dense areas cost more due to trenching, permit requirements, and congestion. The 2025 Fiber Deployment Cost Annual Report, produced by the Fiber Broadband Association and Cartesian, provides the industry's most comprehensive benchmark of fiber build costs across the U.
