

How to add cable tray accessories in Revit

Article Overview

Cable tray accessories in Revit can be added by loading the appropriate fittings and using plugins like the EAE Cable Tray Plug-In to enhance your model efficiently.

Loading Cable Tray Fittings

To add accessories such as elbows, tees, and junctions, first ensure that the cable tray fittings are loaded into your project. In Revit MEP:

- Go to the Cable Tray tool on the Systems tab.
- Select Cable Tray Fitting.
- If no fittings are loaded, click Load Family and navigate to the folder containing your cable tray fittings.
- Select the desired fittings (e.g., channel elbows, tees) and click Open to load them into the project.
- Once loaded, you can place these fittings along your cable tray routes to connect segments or navigate around obstacles .

Using Accessories in Your Model

After loading, accessories can be placed directly on the cable tray:

- Couplings and junction boxes can be inserted at intersections or branching points.
- Elbows and bends allow the tray to change direction vertically or horizontally.
- Revit automatically adjusts the tray length and orientation to accommodate the fi...
