

How to assemble a complete electrical distribution box and its price

Article Overview

A complete electrical distribution box assembly typically ranges from \$150 to \$2,000 or more, depending on size, materials, internal components, and installation requirements.

Price Range Overview

The cost of a complete distribution box assembly varies widely based on several factors:

- **Residential Units:** Standard indoor residential panels usually cost between \$150 and \$1,500, including the enclosure, breakers, wiring, and professional installation . Most typical 100–125 amp services fall in the \$450–\$1,500 range depending on labor complexity and regional pricing .
- **Commercial and Industrial Units:** Larger or industrial-grade boxes, often made of stainless steel or powder-coated steel, can cost \$1,000 to \$2,000 or more due to higher durability, amperage capacity, and advanced control systems .
- **Material Influence:** Plastic enclosures are cheaper, while metal enclosures (steel or stainless steel) are more expensive but offer better durability and corrosion resistance, especially in harsh environments .
- **Internal Components:** A box sold empty is just the shell. Adding high-quality circuit breakers, surge protectors, busbars, and smart monitoring devices significantly increases the price .
- **Customization and Features:** Weather-resistant outdoor units, smart monitoring, r...
