

How to connect a router using fiber optic cable as a repeater

Article Overview

You can connect a router as a repeater over fiber by using an ONT or media converters to convert optical signals to Ethernet, then linking the router to extend the network.

Required Equipment

- Optical Network Terminal (ONT): Converts fiber optic signals into Ethernet for your router .
- Fiber-ready router or repeater: Ensure it supports WAN or SFP ports compatible with fiber .
- High-quality Ethernet cable: Cat6a or higher for optimal speed .
- Fiber optic cable: Typically single-mode with SC/APC or SC/UPC connectors .
- Optional media converters: Needed if extending fiber over long distances or connecting to non-fiber routers .

Step-by-Step Setup

1. Connect Fiber to ONT

- Locate the fiber wall outlet from your ISP.
- Plug the fiber optic cable into the ONT's designated port.
- Power on the ONT and wait for the status lights to stabilize (usually 2-5 minutes),
