

How to open an existing cable tray

Article Overview

Opening a cable tray involves safely removing or lifting the tray cover or side panels to access the cables inside, using appropriate tools and following safety precautions.

Identify the Type of Cable Tray

Cable trays come in various types, including ladder, perforated, solid-bottom, wire mesh, and channel trays. The method to open them depends on the type:

- Ladder trays often have removable side rails or covers.
- Perforated and solid-bottom trays may have bolted covers or snap-on panels.
- Wire mesh trays usually allow cables to be accessed by lifting the mesh or unclipping sections .

Gather Tools and Safety Equipment

Before opening a tray, ensure you have:

- Personal protective equipment (PPE): gloves, safety glasses, and a hard hat.
- Tools: screwdriver, wrench, or socket set for bolts; pliers for clips; and a file for deburring edges if needed .

Steps to Open the Tray

- Inspect the Tray: Check for any obstructions, sharp edges, or tensioned cables.
- Remove Fasteners: Loosen bolts, screws, or clips securing the tray cover or side panels. For snap-on systems, gently lift or slide the cover according to the manufac...
