

How to set up a router without fiber optic cable

Article Overview

You can set up a router without a fiber optic cable by using wireless routers, SIM card routers, mobile hotspots, or fixed wireless internet solutions.

Using a Wireless Router

- Choose a compatible router: Ensure your router supports wireless connectivity and is compatible with your internet service provider (ISP) or alternative internet source .
- Power the router: Connect it to an electrical outlet using the provided power adapter .
- Access router settings: Connect a device via Wi-Fi or temporarily with an Ethernet cable, then open a web browser and enter the router's default IP address (commonly 192.168.1.1) to access the configuration page .
- Configure Wi-Fi: Set a unique network name (SSID) and a strong password. Enable WPA2 or WPA3 encryption for security .
- Connect devices: Once configured, disconnect any temporary cables and connect your devices wirelessly using the SSID and password .

Using a SIM Card Router

Some routers come with SIM card slots and can connect directly to cellular networks, eliminating the need for fiber or Ethernet cables . Steps include:

- Insert a SIM card with an active data plan.
- Power on the router and access its settings via Wi-Fi....
