

How to use a SC24-core fiber optic patch panel

Article Overview

An SC24-core fiber optic patch panel organizes, terminates, and connects up to 24 fiber strands efficiently, allowing easy splicing, patching, and management in a rack or wall-mounted setup.

Overview

An SC24-core fiber optic patch panel is designed to manage 24 fiber strands in a compact 1U enclosure. It can accommodate SC simplex or LC duplex adapters, and is compatible with both single-mode and multimode fibers. The panel typically includes a splice tray, routing spools, and cable entry points to facilitate organized fiber management and protection .

Installation Steps

- Mount the Patch Panel
- Choose a 19" or 23" rack or wall-mount location.
- Secure the panel using screws or brackets according to the rack or wall specifications.
- Ensure the panel is at a convenient height for fiber access .
- Prepare the Fiber Cables
- Strip the outer jacket and inner buffer tubes of the fiber cable.
- Clean the fibers to remove any filling gel or debris.
- Leave approximately 1.6 meters of fiber for routing and splicing
