

How to use the GPJ24-H junction box

Article Overview

The GPJ24-H junction box is used to organize and protect optical cable connections, and proper installation involves secure mounting, correct wiring, and adherence to safety guidelines.

Installation and Mounting

- **Location:** Mount the junction box on a support leg or brace at a convenient height, typically around 4 feet (1.2 meters) from the ground. Ensure there is enough clearance to fully open the front door for wiring and maintenance .
- **Mounting Hardware:** Use #8-32 socket head cap screws and flat washers. The enclosure should be held against the wall or support, and the positions of the mounting holes marked before drilling .
- **Environmental Considerations:** Avoid installing the box outdoors in wet conditions. Moisture can cause corrosion and system errors. For extended storage, keep the unit in a non-condensing atmosphere at 32–104°F (0–40°C) with humidity below 85% .

Wiring and Connections

- **Power Safety:** Always remove power from the unit before installing, removing, or making adjustments .
- **Cable Management:** Ensure sufficient cable length to form a drip loop, preventing water ingress. The box can wire up to two Microcell sets (four units total), and vertical or horizontal Microcells should be connected according to proximity and cable reach .
- **Modular PCB Access:** Wiring, insertion, and removal of the modular PCB are performed through the front of the unit. Make sure the front door can open fully for safe access .
- **Splicing and Connections:** Use proper connectors and follow standard optical cabl...
